Business Philosophy

We contribute to a better and safe life for all the people in the world through delivering professional consulting services to our customers with an honest and sincere attitude.

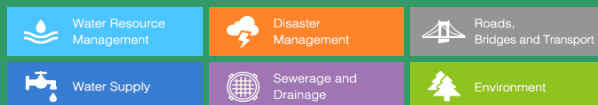

Projects

We, CTI Engineering International Co., Ltd. (CTII), have supported the growth of developing countries for more than 4 decades since 1975 when Overseas Business Division was established in CTI Engineering Co., Ltd. (CTIE), the first consulting engineering company in Japan.

We have enjoyed a good reputation and confidence from home and abroad for our successful achievement in providing a diversity of consulting services for infrastructure projects in the developing countries in Asia, Africa, Middle and South America and others.

Our specialties are;

- river improvement
- urban drainage
- sewerage
- water quality management
- riparian structure
- road structure
- participatory approach to development
- organizational and institutional strengthening
- socio economic improvement
- environmental assessment, etc.
- flood control
- water resources management
- land transport
- solid waste management
- dam structure
- bridge structure

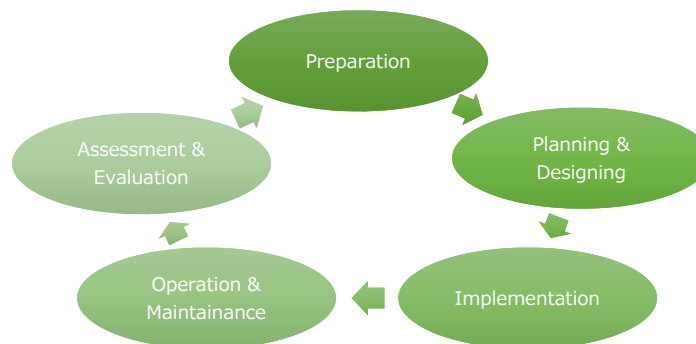

Services

We have been providing a high-quality consulting services all over the world with the deep expertise inherited from CTIE.

We provide the best solution for each client based on our rich experiences as a specialist of overseas consultants and often receive high evaluation from the clients.

Our interactive and mutual teamwork enables to deliver a comprehensive service in mainly three sectors; Watershed Management, Transport, and Urban and Environment.

We also contribute as a leader of global deployment of the CTI group by expanding the market as well as business domain.
